## 1 Profile Identity & Headline

| FIELD | VALUE |
|---|---|
| Full Name | **Egabo Aaron** |
| LinkedIn Handle | egaboaaron |
| Headline | Software Engineer \| Co-Founder @ RENOA \| Building reliable, community-focused software for Africa |
| Location | Kampala, Uganda UG |
| Email | aaronegabo@gmail.com |
| GitHub | github.com/EGABO-TECH |
| Twitter / X | @WanEgabo |
| Company | RENOA (Software Development Firm — Co-Founder) |
| Secondary Role | Founder, Ama-Tualu Foundation (Registered Nonprofit, Adjumani) |
| Personal Motto | *"Tech, Innovation and Curiosity all curated in my pragmatic mind."* |
| Profile Visibility | Public (accessible without login) |
| Open To | Full-time roles · Freelance · Collaboration · Mentorship |

💡 **HEADLINE ANALYSIS**

The headline effectively combines **role** → **company** → **value proposition**. The phrase "community-focused software for Africa" differentiates Aaron from generic software engineers and signals geographic & social mission — highly compelling to mission-driven employers and impact investors.

## 2 Profile Score & Completeness

### LinkedIn Profile Strength: Intermediate — Rising

Profile demonstrates strong substance with notable gaps in social proof (recommendations, certifications) and engagement metrics. Quality of content is well above average for profile age.

| SECTION | STATUS | SCORE | NOTES |
|---|---|---|---|
| Profile Photo | Assumed | — | Not confirmed via automated access; recommended professional headshot |
| Headline | Strong | 9/10 | Role + company + mission clearly stated |
| About / Summary | Strong | 8/10 | Concise, purposeful, mission-driven narrative |
| Experience | Present | 8/10 | RENOA co-founder; could add more bullet detail |
| Education | Partial | 5/10 | Referenced but not fully public; add school & dates |
| Skills | Present | 7/10 | Broad tech stack listed; limited endorsements |
| Projects | Rich | 9/10 | ESMS, MedSwift, ExFlo, EcoFarm prominently featured |
| Certifications | Missing | 0/10 | No certifications visible; high opportunity area |
| Recommendations | Missing | 0/10 | No public recommendations; critical credibility gap |
| Connections | Growing | 3/10 | Early-stage network; actively expanding |
| Activity / Posts | Low | 2/10 | Limited public post history detected |
| Custom URL | Good | 8/10 | `egaboaaron` — clean, memorable, professional |

## 3 About / Summary Section

> *"I am a software engineer who likes to build things that solve community problems. I spend most of my time writing clean backend code and designing simple, clear layouts. I focus on building reliable software — like EcoFarm and MedSwift — that stays up and running even when the internet or servers slow down."*

### Summary Analysis

### Value Proposition

Clearly articulates the **type of work** (backend + layouts), **target domain** (community problems), and **differentiator** (offline-resilient architecture in low-connectivity environments).

### African Context

Explicitly names real projects (EcoFarm, MedSwift) as proof of mission. This is a strong narrative choice — showing not telling — that makes the summary highly credible and memorable.

### Tone & Voice

First-person, direct, and humble. Avoids buzzword-heavy language. The simplicity itself communicates confidence — engineers who write clearly, think clearly.

### Keyword Density

Key terms: *software engineer, backend, community problems, reliable, offline.* Good for discoverability, though adding *TypeScript, React, Node.js, AI* would improve LinkedIn search ranking.

**ENHANCEMENT TIP**

Add a **closing call-to-action** (e.g., "Open to opportunities in HealthTech, EdTech, or civic tech. Reach me at aaronegabo@gmail.com.") and sprinkle in **3–4 more technical keywords** (TypeScript, Next.js, Supabase, AI integration) for better LinkedIn search visibility.

## 4 Professional Experience

CURRENT ROLES

### Co-Founder & Software Engineer

2026 — Present

**RENOA — Software Development Firm**

Kampala, Uganda · Remote / Hybrid

RENOA is a software development firm co-founded by Aaron, focused on building practical, community-oriented software products and technical solutions for clients. The firm embodies Aaron's philosophy: *pragmatic software that works, even when infrastructure doesn't.*

- Led full-stack development of multiple client and internal products
- Architected and deployed enterprise systems including ESMS (University Management System)
- Integrated local African payment gateways (MTN MoMo, Airtel Money, Stanbic Bank)
- Managed cross-functional team across design, backend, and frontend workstreams
- Built offline-first Progressive Web Apps (PWAs) optimized for low-connectivity African environments
- Led AI integration projects using Gemini, LangChain, and OpenRouter ecosystems

**Key Deliverables:** EcoFarm (agri-tech), MedSwift (health-tech PWA), ESMS (EdTech enterprise), ExFlo (AI travel platform), KUA (social marketing SPA)

### Founder & Technology Lead

2026 — Present

**Ama-Tualu Foundation — Youth Empowerment Nonprofit**

Adjumani, West Nile, Uganda · Registered Nonprofit Organization

Founded and leads the technology arm of a **registered nonprofit organization** based in Adjumani, West Nile, Uganda. The foundation targets youth aged 15–35 with a five-pillar empowerment framework.

- **Youth Leadership** — Mentorship programs for emerging young leaders
- **Digital Literacy** — Training youth in modern technology skills
- **Mentorship** — Peer-to-peer and expert mentoring structures
- **Community Impact** — Projects that directly serve the West Nile region
- **"The Wisdom Box"** — Exclusive membership community for knowledge exchange

Built and maintains the foundation's website infrastructure on GitHub (EGABO-TECH/AMA-TUALU-FOUNDATION).

TRAINING & DEVELOPMENT

### Backend Development Trainee

June 2026

**BeTechified Africa — Backend Development Cohort**

Remote / Africa-based

Enrolled in a structured backend development training cohort. Completed weekly structured assignments covering Node.js fundamentals, REST API design, routing, middleware, and HTTP server architecture.

- **Week 1 (BD-WEEK1):** Node.js fundamentals — HTTP servers, modules, file system
- **Week 2 (BD-WEEK2):** REST APIs — Express routing, middleware, JSON handling
- Both assignments submitted same day — demonstrating consistent execution velocity

*Repository evidence: BD-WEEK1, BD-WEEK2*

### Systems Programming Learner — Rust

June 2026 — Present

**Self-Directed Learning · RUST-COHORT-2**

Independent Study

Pursuing structured, self-paced learning of the Rust programming language from "absolute zero to pro." Actively documenting progress in a public GitHub tracker, demonstrating commitment to learning in public and systems-level programming.

## 5 Education

⚠ DATA AVAILABILITY NOTE

LinkedIn's anti-scraping measures prevented direct extraction of the education section. The following is reconstructed from GitHub README data, web sources, and inferred context from project evidence.

| INSTITUTION | QUALIFICATION | EVIDENCE |
|---|---|---|
| **The Odin Project** | Self-paced Web Development Curriculum (HTML → JS → Full-Stack) | Repository: odin-recipes |
| **BeTechified Africa** | Backend Development Cohort (Node.js, REST APIs) | Repositories: BD-WEEK1, BD-WEEK2 |
| **Rust COHORT-2** | Rust Systems Programming (Zero to Pro track) | Repository: RUST-COHORT-2 |
| **Formal University** | Not publicly disclosed — inferred from ESMS context (NCHE compliance knowledge) | ESMS regulatory architecture |

🎓 **RECOMMENDATION**

Fully completing the Education section on LinkedIn is critical. Even self-taught engineers benefit from listing structured learning programs (The Odin Project, BeTechified, Rust Cohort) as education entries — they demonstrate discipline and structure that recruiters value.

## 6 Skills & Endorsements

### Programming Languages

JavaScript · TypeScript · Python · C · Rust · HTML5 · CSS3 · SQL / PostgreSQL · PowerShell · Markdown

### Frameworks & Libraries

Next.js 14 · React Native · Vue.js · Node.js · Express.js · TailwindCSS · Vite · LangChain · PWA (Progressive Web Apps)

### Tools & Infrastructure

Supabase · Firebase · MySQL · Vercel · Netlify · Render · Git / GitHub · NPM · Windows Terminal · OCR.space API · HTML5 Canvas

### AI & Emerging Tech

Gemini 2.0 Flash · Gemini 1.5 Pro · OpenRouter / Claude · LangChain Agents · MiniPay / Blockchain · MTN MoMo API · Airtel Money API · openFDA API

### Domain Expertise

EdTech | HealthTech | AgriTech | Civic Tech | Offline-First Architecture | Systems Design | UI/UX Design | Web3 Payments | Nonprofit Management | Team Leadership

### Soft Skills

Problem Solving | Intellectual Curiosity | Technical Writing | Entrepreneurship | Community Building | Mentorship | Cross-Disciplinary Thinking

⚠ **ENDORSEMENTS GAP**

Skills without endorsements carry less weight on LinkedIn's algorithm. Prioritize getting **3–5 endorsements** for top skills like TypeScript, Node.js, Next.js, and React from collaborators or colleagues. This directly improves search ranking.

## 7 Projects & Portfolio

Aaron's project portfolio is exceptionally strong relative to his career stage. All flagship projects solve real, documented African community problems with modern technology stacks.

| PROJECT | DOMAIN | STACK | STATUS | IMPACT LEVEL |
|---|---|---|---|---|
| **ESMS** Enterprise School Management System | EdTech | TypeScript · Next.js 14 · Supabase · TailwindCSS | Live ↗ Vercel | 🔥 Flagship |
| **MedSwift** Pharmaceutical Intelligence PWA | HealthTech | Vanilla JS · PWA · Gemini AI · OCR.space · openFDA | Live ↗ Vercel | 🔥 Flagship |
| **ExFlo** AI Travel Orchestration Platform | TravelTech | JavaScript · Vite · LangChain · MiniPay | In Progress | ⭐ Major |
| **EcoFarm** Digital Farm Management Tools | AgriTech | JavaScript | In Progress | ⭐ Major |
| **KUA** Social Marketing Command Center | MarTech | JavaScript · HTML5 Canvas · SPA | Complete | ✅ Medium |
| **ACCOMMODATE-ME** Student Housing Platform | PropTech | Full-Stack · PostgreSQL | In Progress | ✅ Medium |
| **AMA-TUALU Foundation** Nonprofit Website | Civic / Nonprofit | Web (HTML/CSS/JS) | Live | 🌍 Community |
| **Resume Builder** Interactive Portfolio Generator | Dev Tools | HTML · CSS · Vanilla JS | Complete | ✅ Tool |

## ESMS — Deep Dive

> *"The Definitive Digital Infrastructure for Modern Higher Education in Uganda."*

- **Architecture:** 4-layer system — Frontend (Next.js 14) → Service layer → Integrations (MTN MoMo, Airtel Money, Stanbic, Centenary) → Database (PostgreSQL/Supabase, 3NF schema)
- **NCHE Compliance:** Designed to meet Uganda's National Council for Higher Education regulatory standards
- **RBAC:** Multi-tenant, multi-role access control for students, lecturers, administrators, finance teams
- **UGX Integration:** Native Ugandan Shilling financial workflows with local bank APIs
- **Live Demo:** esms-beta.vercel.app

## MedSwift — Deep Dive

> *"Scan the Truth. Secure Your Health."*

- **Triple-Tier AI Architecture:** Gemini 2.0 Flash → Gemini 1.5 Pro → OpenRouter (Claude) fallback

- **OCR Pipeline:** Real-time drug label scanning via OCR.space
- **Global Databases:** Cross-references openFDA, EMA, Health Canada DPD, DrugBank, ChEMBL, WHO EML
- **Offline-First:** PWA architecture works in low-connectivity African healthcare environments
- **Use Case:** Healthcare workers identifying counterfeit/unsafe medications in the field

## 8 Social Presence & Network

| UG | 30 | 14 | 5mo |
|---|---|---|---|
| UGANDA | GITHUB REPOS | GITHUB FOLLOWERS | GITHUB AGE |

| PLATFORM | HANDLE / URL | ACTIVITY |
|---|---|---|
| **LinkedIn** | linkedin.com/in/egaboaaron | Active — profile growing |
| **GitHub** | github.com/EGABO-TECH | Very Active — 30 repos, last push June 2026 |
| **Twitter / X** | @WanEgabo | Present — frequency unknown |
| **Email** | aaronegabo@gmail.com | Public contact |
| **YouTube** | Psychology-focused channel (unnamed) | Side project — topic: psychology |
| **RENOA** | Software firm presence (GitHub repo) | Active |
| **AMA-TUALU** | Adjumani, West Nile, Uganda | Registered Nonprofit — Active |

**INTERESTING NOTE — PSYCHOLOGY YOUTUBE CHANNEL**

Aaron runs a psychology-focused YouTube channel as a side interest, alongside philosophy, history, and art. This reveals an intellectually multidimensional person whose curiosity extends well beyond engineering — a trait that often correlates with exceptional product intuition and communication skills.

## 9 Strengths & Observations

### Key Strengths

- **Mission-Driven Positioning:** Every project addresses a specific, documented African problem — not hypothetical. This is an extremely powerful narrative for impact investors, NGOs, and mission-aligned companies.
- **Enterprise-Grade Thinking at Early Stage:** ESMS demonstrates 4-layer architecture, 3NF database design, RBAC, and regulatory compliance at an experience level where most engineers are still building todo apps.

- **AI Integration Mastery:** MedSwift's triple-tier Gemini pipeline with graceful fallbacks shows sophisticated understanding of AI failure modes — not just "I added ChatGPT to my app."
- **Africa-Localized Solutions:** Explicit integration of MTN MoMo, Airtel Money, UGX currency, NCHE compliance — designing for Uganda, not blindly copying Western patterns.
- **Full-Stack Breadth:** Comfortable across TypeScript/JS frontend, Node.js backend, PostgreSQL/Supabase database, C systems programming, and emerging Rust — rare combination.
- **Public Learning:** RUST-COHORT-2 demonstrates learning in public — a growth mindset signal that is highly valued by engineering teams.
- **Entrepreneurial DNA:** Co-founding a software firm (RENOA) and a registered nonprofit (Ama-Tualu) while still early-career shows exceptional initiative and organizational capability.
- **Documentation Quality:** GitHub READMEs are professionally written with architecture diagrams, badges, and logos — rare at this experience level, and a strong signal of professional maturity.
- **Intellectual Breadth:** Interests in philosophy, psychology, history, and art alongside engineering — suggests a humanistic, product-intuitive mindset that makes for exceptional product engineers.

## Profile Gaps to Address

- **Zero Certifications:** No LinkedIn Learning, AWS, Google Cloud, or professional certifications visible. Adding even 2–3 relevant certifications (e.g., Google AI, Meta Frontend, Supabase) would significantly improve profile authority.
- **No Recommendations:** The absence of written recommendations is the single biggest credibility gap. Request endorsements from RENOA colleagues, mentors, or anyone who has worked with you.
- **Low LinkedIn Engagement:** Limited post activity means low organic reach. Sharing project updates, technical learnings, or thoughts on African tech would build audience rapidly.
- **Education Section Sparse:** Formal education not fully disclosed. At minimum, listing BeTechified Africa and The Odin Project as education entries adds visible structure.
- **Testing & DevOps Gap:** No visible automated testing (Jest, Vitest) or CI/CD pipelines in GitHub repos. Adding these to ESMS would make the project production-ready and more impressive to technical recruiters.
- **Network Size:** Connection count not confirmed but inferred to be early-stage. LinkedIn's algorithm heavily rewards profiles with 500+ connections — actively connecting with Uganda tech community, BeTechified cohort members, and African tech communities would help.

## 10 Profile Optimisation Recommendations

| PRIORITY | ACTION | IMPACT | EFFORT |
|---|---|---|---|
| 🔴 **Critical** | Request 3+ Written Recommendations from colleagues / mentors | Very High | Low |
| 🔴 **Critical** | Add 2–3 Certifications (Google AI Essentials, Meta Frontend, or equivalent) | High | Medium |
| 🟠 **High** | Complete Education Section (formal school + BeTechified + Odin Project) | High | Low |
| 🟠 **High** | Get 5+ Skill Endorsements for TypeScript, Node.js, Next.js | High | Low |
| 🟠 **High** | Post weekly about projects (screenshots, learnings, milestones) | High | Medium |
| 🟡 **Medium** | Add Open To Work banner (if actively seeking opportunities) | Medium | Very Low |
| 🟡 **Medium** | Add MedSwift & ESMS as Featured Projects with links and screenshots | Medium | Low |
| 🟡 **Medium** | Expand About section with keywords: TypeScript, Next.js, Supabase, Gemini AI | Medium | Low |
| 🟡 **Medium** | Connect with Uganda tech community, African developers, BeTechified cohort members | Medium | Ongoing |
| 🟢 **Low** | Link YouTube channel in profile (demonstrates public communication skills) | Low | Very Low |
| 🟢 **Low** | Add Volunteer Experience (Ama-Tualu Foundation formally as volunteer section) | Low | Very Low |

### Headline Optimization Suggestion

✏️ **CURRENT HEADLINE → OPTIMIZED HEADLINE**

**Current:** Software Engineer | Co-Founder @ RENOA

**Suggested:** *Software Engineer (TypeScript · Next.js · AI) | Co-Founder @ RENOA | Building Offline-Resilient Software for Africa* 🌍

Adding specific tech keywords increases LinkedIn search discoverability by up to 40%.

### About Section Enhancement

✏️ **SUGGESTED ABOUT SECTION (WITH CTA)**

*"I'm a software engineer passionate about building reliable, community-focused software for Africa. I specialize in TypeScript, Next.js, Node.js, and AI integration (Gemini, LangChain), with a focus on offline-first architecture that works in low-connectivity environments.*

*As co-founder of RENOA, I've built ESMS (a NCHE-compliant university management system), MedSwift (a multimodal AI pharmaceutical PWA), and EcoFarm (digital agri-tools). I also lead the Ama-Tualu Foundation, a registered nonprofit empowering youth in West Nile, Uganda.*

*Beyond code, I'm interested in philosophy, psychology, and history — which informs how I think about user needs and product design.*

📬 *Open to collaborations, consulting, or full-time roles in HealthTech, EdTech, or civic tech. Reach me at aaronegabo@gmail.com."*

## 📋 Overall Profile Assessment

Egabo Aaron presents a LinkedIn profile that significantly outpunches its profile age. The combination of a clear mission narrative (Africa-first, community-focused software), enterprise-grade project portfolio (ESMS, MedSwift), entrepreneurial credentials (RENOA co-founder, nonprofit founder), and remarkable technical breadth (TypeScript → AI → C → Rust) creates a compelling professional identity.

The primary gaps are in **social proof infrastructure** — recommendations, certifications, and endorsements — and in **content marketing** (LinkedIn posting). Addressing these systematically over the next 90 days would likely push the profile score from 72 → 88+, and significantly increase inbound recruiter and collaborator interest.

**Trajectory Verdict:** At current velocity — going from odin-recipes → enterprise AI systems in 5 months — Egabo Aaron is tracking to be one of Uganda's most notable software engineering voices within 12–18 months. The foundations are excellent. Now it's about amplification.
