SKILLS

LANGUAGES & DATABASES

JavaScript, HTML/CSS, SQL, MySQL, PostgreSQL (Within Supabase)

FRAMEWORKS

Node.js

ARCHITECTURE & PROTOCOLS

Offline-First Architecture, Resilient System Design, Simple-Clean Software

TOOLS & METHODOLOGIES

Git, GitHub, VS Code, Vercel, Netlify, SDLC, SWOT Analysis and Video Editing using Google Vids and Speechma

LEADERSHIP & INTERPERSONAL

- Technical Team Management
- Cross-Functional Collaboration
- Effective Communication
- Adaptability
- Collaboration
- Time Management
- Problem-solving

LANGUAGES SPOKEN

English, Madi, Lugbara

PROFESSIONAL SUMMARY

Passionate software engineering student dedicated to developing practical and reliable software solutions that address real-world challenges. Expertise in designing offline-first applications that function seamlessly without stable internet connectivity, alongside creating clean database architectures and engaging with open-source communities. As a co-founder and tech lead at RENOA, a strong commitment to fostering collaboration and transforming innovative ideas into effective digital tools that benefit the community drives every project. Focus on building systems that prioritize simplicity, efficiency, and resilience.

EXPERIENCE

Student Innovator and Pitch Participant

05/2026

Gemini Career Glow Up Night

- Participated in a high stakes pitch night competition where we had to come up with a product using Nano Banana and pitch it in under 60 seconds.
- Live Online Workshop

Co-Founder and Technical Project Manager

04/2026 to Current

RENOA - Kampala

- Co-Founded a student-led Software Engineering Firm to translate academic knowledge learnt into industry standard projects.
- Build reliable, efficient and simple software that solves community problems especially those that address the SDGs.

Student Innovator and Exhibitor

05/2026 to 05/2026

Appropriate Technologies Expo and Launch - UMA Showgrounds, Kampala

- Exhibited MedSwift, an offline-first Progressive Web Application (PWA) designed to prevent clinical errors and facilitate pharmaceutical safety verification without stable internet connectivity.
- Showcased EcoFarm, a digital agricultural management platform engineered with a symbol-based interface to streamline market access and logistics for regional farmers.
- Pitched enterprise architecture blueprints and innovation-to-impact narratives directly to cross-industry stakeholders, tech leaders, and community development representatives.

National Finalist (Cloud Track)

09/2025 to 01/2026

Huawei ICT Competition - Kampala

- Undertook rigorous deep dive into Huawei HCIA curriculum, mastering fundamentals of cloud computing, big data, and artificial intelligence, and applied knowledge to compete nationally, earning spot as Cloud Track National Finalist.
- Competed nationally in global competition, specializing in artificial intelligence, cloud computing, cloud services, and big data, demonstrating advanced technical skills.
- Completed HCIA training tracks in artificial intelligence, cloud architecture, cloud computing, and big data.

EDUCATION

Bachelor of Science: Software Engineering

Expected 08/2029

CAVENDISH UNIVERSITY UGANDA - Nsambya, Kampala

Concentrations: Software Architecture and Intelligent Systems

Related Coursework: Computer Architecture and Organization, Discrete Mathematics, Calculus in Software Engineering, Artificial Intelligence, Web Development, Systems Analysis and Design, Principles of Programming, Numerical Analysis and Design, Database Systems and Management

GPA: 4.70/5.00

ACTIVITIES AND LEADERSHIP

GitHub Developer Community

May 2026 - Present

Active Contributor (Ranked 81st nationally as of now)

Maintain a high-ranking professional online presence among open-source developers in Uganda by consistently committing code and collaborating on regional technical initiatives.

Akili Za Kesho Ventures

May 2026 - Present

Technical Trainer & Volunteer

Facilitate knowledge-sharing initiatives focused on data utilization, helping transform local challenges into innovative, bankable sustainable ventures in relation to the SDGs.

YinAndYangShadow (YouTube)

March 2026 - Present

Content Creator

Strategize, script, and manage a faceless YouTube channel focused on the Dark Psychology niche, driving audience engagement and content production.

Naano

April 2026 - Present

Naano Creator

I architect high-intent LinkedIn growth workflows through marketing as a strategy.
